PROFESSIONAL SUMMARY

Frontend Software Engineer with 3+ years of experience crafting high-performance, scalable web applications using React.js and modern JavaScript. Specialized in building complex dashboards, multi-tenant UI architectures, authentication systems, and responsive component libraries. Comfortable working across fintech, enterprise, and B2B SaaS products with strong design-to-code execution.

TECHNICAL SKILLS

Core Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

Frameworks & Libraries: React.js, Next.js, Material UI (v8), Tailwind CSS, Bootstrap

State Management: Redux, Zustand, Context API

Build & Tooling: Vite, Webpack, Git, GitHub, VS Code, Figma

API & Integration: REST APIs, Axios, WebSocket, Postman

AI Tools & Integration: GitHub Copilot, Cursor, Claude Code, Google Antigravity, ChatGPT; OpenAI GPT API, Claude & Gemini APIs for AI-assisted development and LLM-powered features

Backend Exposure: Node.js, Express.js, MySQL (for API understanding & full-stack collaboration)

Cloud / DevOps: AWS S3, Docker, CI/CD pipelines

PROFESSIONAL EXPERIENCE

Software Engineer (Frontend) | Digiwagon Technologies

Sep 2023 – Present

- ▶ Led frontend architecture for 5+ enterprise and SaaS products using React.js, Redux, and Context API; established reusable component libraries reducing development time across projects.
- ▶ Delivered complex dashboards with MUI v8 charts, real-time data visualization, CSV/PDF export, and advanced multi-filter UIs for data-intensive enterprise platforms.
- ▶ Built OTP-based authentication, JWT session management, role-based access control, and protected route patterns used across multi-tenant SaaS products.
- ▶ Developed interactive eBook reader interface with integrated calculators, dynamic content delivery, and payment flow using Razorpay/Stripe.
- ▶ Collaborated with UX/design (Figma) and backend teams to translate requirements into pixel-accurate, accessible, and performant UIs.
- ▶ Maintained CI/CD deployments on AWS EC2 and managed static assets on S3.

Frontend Developer | PNInfosys, Gwalior

Jul 2022 – Sep 2023

- ▶ Built responsive, cross-browser web interfaces using React.js, JavaScript (ES6+), HTML5, CSS3, and Bootstrap.
- ▶ Integrated REST APIs to power dynamic data-driven components with form validation, error handling, and real-time updates.
- ▶ Worked closely with backend developers to define API contracts and improve data-rendering performance.

KEY PROJECTS

KYC / Identity Verification SaaS — Admin Dashboard & Module Builder — React, MUI, Redux, REST APIs

- ▶ Built component-driven admin dashboards, module builders, and verification template designers enabling multi-tenant KYC workflow configuration for fintechs and NBFCs.
- ▶ Implemented dynamic forms, state-managed workflow builders, and session orchestration UIs with complex nested routing.

KMS eBooks Platform — Reader UI & Admin Dashboard — React, Next.js, Tailwind CSS, REST APIs, Razorpay

- ▶ Designed and developed a dynamic eBook reader interface, integrated calculators (GST, Income Tax), book discovery pages, and a complete admin content management dashboard.
- ▶ Implemented PCI-DSS compliant checkout flow and entitlement-based content access controls on the frontend.

UL Intel — Product Analytics & Comparison Platform — *React, MUI v8, Context API*

- ▶ Built analytics dashboards with MUI v8 charts, product comparison tables, and filter-driven views; added one-click PDF export of visual reports.
- ▶ Implemented OTP authentication, dynamic route protection, and Intel–Sensory module handoff with deep-linked navigation.

Xanado — B2B International Trade Marketplace — *React, REST APIs, SCSS*

- ▶ Developed purchase/sell order management modules, buyer wallet UI, license compliance forms, and warehouse management screens.
- ▶ Implemented multi-step authentication flows ensuring secure and compliant operations for international traders.

UL Search — GPT-Enabled Enterprise Search Platform — *React, MUI, REST APIs*

- ▶ Built search analytics dashboard, feedback UIs, and data export flows; integrated search API and statistics reporting with real-time updates.
- ▶ Integrated OpenAI GPT API to power natural-language query understanding and AI-generated result summaries on the frontend.

Tractor Seva — Multi-Portal Service Platform — *React, Node.js, MySQL*

- ▶ Developed three distinct React frontends (Admin, Workshop, Customer) with responsive layouts and full API integration.

EDUCATION

B.Tech — Computer Science Engineering

2018 – 2022 • CGPA: 8.6 / 10
